

[illegible]

A schematic diagram of a DNA molecule. The DNA is represented by a black line with dots at each base position. The sequence is numbered: 60, 55, 18, 20C, 25, 30, 35, 40, 45, 50, 55, 60, 66, 70, 75, 80, 85, 90, 95, 100. A red circle is at position 10, and a blue circle is at position 66. A line connects the red circle to the blue circle. The DNA is shown in a looped configuration.
